**CoCo Verspoor** is a graduate of the Hahnemann College for Heilkunst, and most recently Eurythmy Spring Valley.

Her own health journey led her onto a fruitful exploration of the science and art of Heilkunst, as well as the new art of eurythmy that has the movement of life at its origin. She realizes that, for the evolution of our modern consciousness, health must address these two aspects of life— science and art have to meet, which is the Romantic basis of our health and our creative power.

Based on these realizations, CoCo offers a unique approach to health that is both scientific, lawful, and artistic. She offers consultation for all who are striving for better health, with **Heilkunst** treatment, individualized **Regimen** treatment, and **Healing Movement** sequences to enhance the whole healing experience. Her approach aims at removing deep emotional blockages, strengthening the general immunity, and improving the overall fulfillment of life with healthy body and mind, awakened soul forces and new self-unfolding capacities.

CoCo is taking patients of all ages and with all types of health problems. The usual HCH Family Discount applies for those seeking greater health for the whole family.

*Please share this time-limited offer with your friends so they, and their friends, can take advantage of the opportunity to experience, as you have, Heilkunst and better health for life NOW!*
